Climate Change and Risk in South and Southeast Asia Sociopolitical

Perspectives, Edited By [Devendraraj Madhanagopal](#), [Salim Momtaz](#) Copyright 2023

ISBN 9781003216476, 342 Pages 26 B/W Illustrations, Published November 29, 2022 by Routledge, \$54.99

DESCRIPTION

This book, focuses on South and Southeast Asia, upgrades our understanding of the influence of multiple sociopolitical and governance factors on climate change and risks. Moving beyond science and technology-oriented discussions on climate change, it argues that the real solutions to climate change problems lie in societies, governance systems, non-state actors, and the power and politics underpinning these systems.

It presents a range of detailed conceptual, empirical, and policy-oriented insights from different nations of South and Southeast Asia, including India, Bangladesh, Sri Lanka, Indonesia, Vietnam, Maldives, and Bhutan. The chapters bring forth critical discussions of climate change, covering a diverse range of topics including livelihoods, gender, community perspectives, relocation, resilience, local politics, climate change communication, governance, and policy responses. By investigating climate change vulnerabilities and as well as offering feasible solutions to the states and other non-state actors in responding to climate change and risks, this book deepens our existing knowledge of the social and political dimensions of climate change.

With interdisciplinary perspectives, this book will appeal to all students, researchers, and scholars of environmental studies, geography, disaster studies, sociology, policy studies, development studies, and political science. It provides valuable reading to practitioners, policymakers, and professionals working in related fields.
