

Environmental Management and Sustainable Development of Cities: A Case Study of Ibadan, Nigeria

1(Edited by)

This study contends that proper urban environmental management strategies are vital to the sustainable development of cities in any country.

It demonstrates that cities as drivers of sustainable development can be positive forces in support of social equality, cultural vitality, economic prosperity and environmental sustainability.

It takes a primary focus on Ibadan, Nigeria. Most cities in sub-Saharan Africa have become badly degraded.

Leaders and planners rarely fully grasp the meaning of the concept of sustainable development, and fail to combine their bids to achieve economic development with urban environmental management strategies.

The book describes how reformation and transformation are still possible, in Ibadan and elsewhere, and discusses the Sustainable Ibadan Project (SIP) as a methodology to turn Ibadan into a globally competitive and sustainable city.
