[Pineschi, Laura](#)(Edited by)

Part of the [Routledge Studies in Cultural Heritage and International Law](#) series

The importance of cultural heritage - in both its tangible and intangible forms - to sustainable development and its economic, social and environmental components is increasingly evident in the recent practice of intergovernmental and non-governmental organizations at the universal and regional level.

Due consideration for the integration of the cultural dimension in the implementation of Agenda 2030 has begun to grow in various international fora, including initiatives to emphasize the role and contribution of tangible and intangible heritage as drivers and enablers of sustainable development.

This book offers a thorough academic investigation on the importance of cultural heritage to sustainable development and cultural rights from an international law perspective.
