

A Post Global City in Thought and the Changing Face of the Environment

Fahri Ozsungur(Edited by)

Part of the **Urban development and infrastructure** series

In this conceptual study, the stages of globalization are examined and the future of the post-globalization world order is discussed.

The study focuses on the impact of post-globalism on cities, the redefinition of the city, and what it corresponds to both in today's power world, as well as in the future.
