About the Author	ix
Preface	x
Notation Index	xi
About the Companion Website	xvi
<b>1 Classification and Physical Properties of Soils</b>	<b>1</b>
1.1 Agricultural and engineering soil	1
1.2 Engineering definitions	2
1.3 Clay soils	4
1.4 Field identification of soils	5
1.5 Laboratory classification of soils	6
1.6 Activity of a clay	14
1.7 Soil classification and description	14
1.8 Soil properties	21
Exercises	30
<b>2 Permeability and Flow of Water in Soils</b>	<b>33</b>
2.1 Subsurface water	33
2.2 Flow of water through soils	35
2.3 Darcy's law of saturated flow	36
2.4 Coefficient of permeability, $k$	36
2.5 Determination of permeability in the laboratory	36
2.6 Determination of permeability in the field	40
2.7 Approximation of coefficient of permeability	42
2.8 General differential equation of flow	42
2.9 Potential and stream functions	44
2.10 Flow nets	45
2.11 Critical flow conditions	49
2.12 Design of soil filters	51
2.13 Capillarity and unsaturated soils	54
2.14 Earth dams	59
2.15 Seepage through non-uniform soil deposits	62
Exercises	71
<b>3 Total and Effective Stress</b>	<b>74</b>
3.1 State of stress in a soil mass	74
3.2 Total stress	75
3.3 Pore pressure	76
3.4 Effective stress	77
3.5 Stresses induced by applied loads	80
Exercises	89

<b>4</b>	<b>Shear Strength of Soils</b>	<b>91</b>
4.1	Friction	91
4.2	Complex stress	91
4.3	The Mohr circle diagram	92
4.4	Cohesion	96
4.5	Coulomb's law of soil shear strength	96
4.6	Modified Coulomb's law	98
4.7	The Mohr–Coulomb yield theory	98
4.8	Determination of the shear strength parameters	99
4.9	Determination of the shear strength parameters from triaxial testing	106
4.10	The pore pressure coefficients A and B	112
4.11	The triaxial extension test	118
4.12	Behaviour of soils under shear	119
4.13	Operative strengths of soils	122
4.14	The critical state	124
4.15	Sensitivity of clays	129
4.16	Residual strength of soil	130
	Exercises	133
<b>5</b>	<b>Eurocode 7</b>	<b>136</b>
5.1	Introduction to the Structural Eurocodes	136
5.2	Introduction to Eurocode 7	138
5.3	Using Eurocode 7: basis of geotechnical design	139
5.4	Geotechnical design by calculation	139
5.5	Ultimate limit states	145
5.6	The EQU limit state	147
5.7	The GEO limit state and design approaches	150
5.8	Serviceability limit states	155
5.9	Geotechnical design report	155
<b>6</b>	<b>Site Investigation</b>	<b>156</b>
6.1	EN 1997-2:2007 – Ground investigation and testing	156
6.2	Planning of ground investigations	157
6.3	Site exploration methods	160
6.4	Soil and rock sampling	164
6.5	Groundwater measurements	170
6.6	Field tests in soil and rock	172
6.7	Geotechnical reports	179
<b>7</b>	<b>Lateral Earth Pressure</b>	<b>183</b>
7.1	Earth pressure at rest	183
7.2	Active and passive earth pressure	183
7.3	Rankine's theory: granular soils, active earth pressure	185
7.4	Rankine's theory: granular soils, passive earth pressure	190
7.5	Rankine's theory: cohesive soils	191
7.6	Coulomb's wedge theory: active earth pressure	195
7.7	Coulomb's wedge theory: passive earth pressure	202
7.8	Surcharges	205
7.9	Choice of method for determination of active pressure	210
7.10	Backfill material	210
7.11	Influence of wall yield on design	215
7.12	Design parameters for different soil types	216
	Exercises	219

8.2	Gravity walls	
8.3	Embedded walls	224
8.4	Failure modes of retaining structures	225
8.5	Design of gravity retaining walls	226
8.6	Design of sheet pile walls	236
8.7	Braced excavations	248
8.8	Reinforced soil	250
8.9	Soil nailing	251
	Exercises	252
<b>9</b>	<b>Bearing Capacity and Shallow Foundations</b>	<b>255</b>
9.1	Bearing capacity terms	255
9.2	Types of foundation	255
9.3	Ultimate bearing capacity of a foundation	256
9.4	Determination of the safe bearing capacity	263
9.5	The effect of groundwater on bearing capacity	264
9.6	Developments in bearing capacity equations	265
9.7	Designing spread foundations to Eurocode 7	269
9.8	Non-homogeneous soil conditions	284
9.9	Estimates of bearing capacity from <i>in situ</i> testing	285
	Exercises	288
<b>10</b>	<b>Pile Foundations</b>	<b>290</b>
10.1	Introduction	290
10.2	Classification of piles	290
10.3	Method of installation	291
10.4	Pile load testing	294
10.5	Determination of the bearing capacity of a pile	296
10.6	Designing pile foundations to Eurocode 7	303
10.7	Pile groups	311
	Exercises	313
<b>11</b>	<b>Foundation Settlement and Soil Compression</b>	<b>315</b>
11.1	Settlement of a foundation	315
11.2	Immediate settlement	316
11.3	Consolidation settlement	325
11.4	Application of consolidation test results	335
11.5	General consolidation	336
11.6	Eurocode 7 serviceability limit state	343
11.7	Isotropic consolidation	344
11.8	Two-dimensional stress paths	346
	Exercises	352
<b>12</b>	<b>Rate of Foundation Settlement</b>	<b>355</b>
12.1	Analogy of consolidation settlement	355
12.2	Distribution of the initial excess pore pressure, $u_i$	355
12.3	Terzaghi's theory of consolidation	355
12.4	Average degree of consolidation	359
12.5	Drainage path length	359
12.6	Determination of the coefficient of consolidation, $c_v$ , from the consolidation test	360
12.7	Determination of the permeability coefficient from the consolidation test	362

12.8	Determination of the consolidation coefficient from the triaxial test	362
12.9	The model law of consolidation	365
12.10	Consolidation during construction	366
12.11	Consolidation by drainage in two and three dimensions	369
12.12	Numerical determination of consolidation rates	369
12.13	Construction pore pressures in an earth dam	374
12.14	Numerical solutions for two- and three-dimensional consolidation	376
12.15	Sand drains	378
	Exercises	384
<b>13</b>	<b>Stability of Slopes</b>	<b>386</b>
13.1	Planar failures	386
13.2	Rotational failures	390
13.3	Slope stability design charts	408
13.4	Wedge failure	414
13.5	Slope stability analysis to Eurocode 7	416
	Exercises	421
<b>14</b>	<b>Compaction and Soil Mechanics Aspects of Highway Design</b>	<b>432</b>
14.1	Field compaction of soils	432
14.2	Laboratory compaction of soils	434
14.3	Specification of the field compacted density	441
14.4	Field measurement tests	442
14.5	Highway design	446
	Exercises	457
	References	460
	Index	466
