Part I Methods and Tools

1	Introduction	3
	Angelo Pio Rossi and Stephan van Gasselt	
1.1	Planetary Geology as a Discipline	3
1.2	The Playground for Planetary Geology	7
1.3	Future Prospects	12
2	Geologic Tools	15
	Monica Pondrelli, Victor R. Baker, and Ernst Hauber	
2.1	Geological Reasoning in Planetary Science	15
2.1.1	The Problem of Convergence (Equifinality)	16
2.1.2	The Role of Analogies	16
2.1.3	Terrestrial Analogs in Planetary Geology	17
2.1.4	The Stages of Geological Reasoning	22
2.2	Stratigraphy: The Tool to Order Rocks and Time	22
2.2.1	Relative Stratigraphy	24
2.2.2	Layer Terminations and Geometries	26
2.2.3	Unconformities and the Missing Time	28
3	Exploration Tools	33
	Stephan van Gasselt, Angelo Pio Rossi, Damien Loizeau, and Mario d'Amore	
3.1	Introduction	33
3.2	Imaging	35
3.3	Composition and Properties	39
3.4	Topography and Structure	42
3.5	Geophysical Tools	44
3.5.1	Potential Fields	44
3.5.2	Seismics and Subsurface Sounding	45
3.6	Landing Sites and In-Situ Tools	47
3.6.1	Contact Experiments	47

3.6.2	In-Situ Laboratories	48
3.7	Sample Return	51
4	Cartography Tools	55
	Trent M. Hare, James A. Skinner, Jr., and Randolph L. Kirk	
4.1	Introduction	55
4.2	Digital Image Processing	57
4.3	Map Projections	60
4.4	Nomenclature	62
4.5	Digital Mapping	63
4.5.1	Geologic Mapping	64
4.5.2	Attribute and Symbolology Standards	66
4.5.3	Mapping Scale and Data Collection	67
4.5.4	Metadata	67
4.5.5	Analysis	68
5	Ground Truth	71
	Angelo Pio Rossi and Stephan van Gasselt	
5.1	Introduction	71
5.2	Lander and Rover Exploration	72
5.3	The Moon	76
5.4	Venus	81
5.5	Mars	84
5.6	Ground Truth of Small and Remote Objects	93
5.6.1	Small Bodies: Asteroids and Comets	93
5.6.2	Outer Solar System and Water Worlds	94
5.7	The Future of Ground Truth	97

Part II Processes and Sources

6	Meteorites	103
	Ansgar Greshake and Joerg Fritz	
6.1	Introduction	103
6.2	Meteorite Falls and Finds	104
6.3	Origin of Meteorites	105
6.4	Classification of Meteorites	106
6.4.1	Chondrites	106
6.4.2	Non-chondritic Meteorites	113
6.5	Chronology of the Solar System as Told by Meteorites	119
7	Impact Cratering	123
	Thomas Kenkmann and Gerwin Wulf	
7.1	Introduction	123
7.2	The Impactor Flux	126
7.3	The Three Stages of Impact Cratering	127
7.3.1	Contact and Compression	127
7.3.2	Excavation	128
7.3.3	Modification	128

7.4	The Morphology of Impact Craters	132
7.4.1	Simple Craters	132
7.4.2	Central-Peak Craters.....	132
7.4.3	Peak-Ring Craters	134
7.4.4	Multi-Ring Craters	135
7.5	Ejecta Facies	136
7.5.1	Emplacement Under Dry Vacuum	136
7.5.2	The Effect of Atmospheres and Target Volatiles	138
7.5.3	Rayed Craters and Secondary Craters	139
7.6	Oblique Impacts	141
7.6.1	Crater Outline.....	141
7.6.2	Ejecta Distribution.....	142
7.6.3	Central-Uplift Structure	142
7.7	The Influence of the Target	142
7.8	Impact Lithologies and Target Weakening Effects	143
8	Endogenic Processes.....	147
	Ernst Hauber, Daniel Mège, Thomas Platz, and Petr Brož	
8.1	Introduction.....	147
8.2	Landforms of Endogenic Processes	149
8.2.1	Tectonic Landforms	149
8.2.2	Volcanic Landforms	155
8.3	Tectonism: Driving Forces	161
8.3.1	The Tectonic Style of the Earth	162
8.3.2	The Tectonic Style of One-Plate Planets	164
8.4	Magmatism and Volcanism: Driving Forces	171
8.4.1	Igneous Volcanism.....	171
8.4.2	Non-igneous Volcanism	172
8.5	Magmatic Activity	173
8.5.1	Composition	173
8.5.2	Plutonism/Intrusions.....	174
8.5.3	Effusive Volcanism	175
8.5.4	Explosive Volcanism	176
8.5.5	Environmental Effects	177
8.5.6	Outgassing	178
8.6	Volcanic Characterization of Solar System Bodies	178
8.6.1	The Moon	178
8.6.2	Mercury	179
8.6.3	Venus	180
8.6.4	Mars	181
8.6.5	Io	181
8.6.6	Icy Bodies	182
9	Surface Processes	185
	Nicolas Mangold	
9.1	Introduction.....	185

9.2	Eolian Transport and Erosion	186
9.2.1	Entrainment of Grains by Wind	186
9.2.2	Dunes and Eolian Sandstones	187
9.2.3	Loess, Dust and Duststones	190
9.2.4	Wind-Related Patterns	191
9.3	Fluvial Erosion and Deposition	193
9.3.1	Rivers: Diluted Flows	193
9.3.2	Flood Systems: Concentrated Flows	198
9.3.3	Fluvial and Lacustrine Deposits	200
9.4	Mass-Wasting Processes	202
9.4.1	Rockfalls: Granular Behavior	202
9.4.2	Debris Flows: Viscous Behavior	205
9.5	Ice-Related Processes and Landforms	206
9.5.1	Glacial Landforms	206
9.5.2	Sublimation-Driven Landforms	209
9.5.3	Periglacial Landforms	211
9.6	Chemical Processes	213
9.6.1	Weathering	213
9.6.2	Authigenesis and Diagenesis	214
9.6.3	Chemical Sediments	215
9.6.4	Varnishes and Space Weathering	217
10	Interiors and Atmospheres	221
	Doris Breuer and Nicola Tosi	
10.1	Formation and Interior Structure of Terrestrial Bodies	221
10.1.1	Planet Formation	221
10.1.2	Interior Structure and Primary Differentiation	222
10.1.3	Constraints on the Interior Structure	224
10.2	Long-Term Evolution of the Interior	228
10.2.1	Convection and Rock Rheology	228
10.2.2	Thermal and Magmatic Evolution	231
10.3	Magnetic Field Generation	236
10.3.1	Dynamo Generation	236
10.3.2	Crustal Field	239
10.4	Planetary Atmospheres	241
10.4.1	Composition and Surface Temperature	241
10.4.2	Atmosphere Formation and Loss Processes	242
Part III Integration and Geological Syntheses		
11	The Terrestrial Planets	249
	Angelo Pio Rossi, Stephan van Gasselt, and Harald Hiesinger	
11.1	Introduction	249
11.1.1	Comparing Terrestrial Planets	249
11.1.2	Timing of Events: Cratering Histories	254

11.2	Early Phases	257
11.2.1	Formation and Magma Oceans	257
11.2.2	Giant Impacts	258
11.2.3	Basin Formation	259
11.2.4	Secondary Crust Formation	263
11.2.5	Continents and Planetary Counterparts	264
11.2.6	Ancient Hydrologies and Surface Alteration	268
11.3	Intermediate, Diverging Histories	271
11.3.1	From the Surface to the Subsurface	271
11.3.2	Cryosphere and Water Loss	274
11.4	Recent Phases	276
11.4.1	Planetary Global Change and Perspectives	280
12	Icy and Rocky–Icy Satellites	285
	Roland Wagner, Katrin Stephan, and Nico Schmedemann	
12.1	The Icy and Rocky–Icy Satellites of Jupiter	285
12.1.1	The Callisto–Ganymede Dichotomy	286
12.1.2	Europa: A Heavily Tectonized Ice–Rock Satellite	291
12.1.3	Future Missions to the Icy Galilean Satellites	294
12.2	The Satellites of Saturn	294
12.2.1	Mimas and Iapetus: Old Cratered Surfaces	294
12.2.2	Tethys, Dione and Rhea: Impact Cratering and Tectonism	296
12.2.3	Enceladus: A Small Active Icy World	298
12.2.4	Titan: A Large Earth-Like Satellite	300
12.2.5	Impact Crater Forms on the Saturnian Satellites	303
12.3	The Satellites of Uranus	303
12.3.1	Oberon, Titania and Umbriel	303
12.3.2	Ariel and Miranda	305
12.4	Neptune’s Largest Satellite Triton	306
12.5	Charon: Largest Satellite of Dwarf Planet Pluto	307
13	Small Bodies and Dwarf Planets	311
	Nico Schmedemann, Matteo Massironi, Roland Wagner, and Katrin Stephan	
13.1	Evolution of Asteroids and Dwarf Planets	311
13.1.1	Formation	313
13.1.2	Composition	315
13.1.3	Dynamics	317
13.1.4	Geological Evolution	319
13.2	Evolution of Comets	324
13.2.1	Orbits and Reservoirs	326
13.2.2	Origin	327
13.2.3	Overall Anatomy and Fate	327
13.2.4	Composition	329
13.2.5	Cometary Geology	331

14.1	Astrobiology	347
14.2	The Emergence of Life.....	349
14.2.1	The Chemical Origin of Life	350
14.2.2	Earth Formation, Origin and Early Evolution of Life.....	351
14.2.3	Life and Extreme Environments	356
14.2.4	Astrobiology Research in Our Solar System	361
14.3	Planetary Exploration	362
14.3.1	Space Exploration of Mars	362
14.3.2	Biosignatures and Life Detection	364
14.3.3	Planetary Protection	364
14.3.4	Life in the Universe.....	365
15	Space and Planetary Resources	369
	Angel Abbud-Madrid	
15.1	Introduction.....	369
15.2	Resource Prospecting	370
15.2.1	The Moon	370
15.2.2	Mars	375
15.2.3	Asteroids, Comets, and the Moons of Mars	377
15.3	Resource Mining	380
15.3.1	Extraction	380
15.3.2	Material Handling and Transportation.....	382
15.3.3	Processing.....	383
15.4	Resource Utilisation.....	385
	Appendix: Planetary Facts, Data and Tools	395
	Planetary Constants	395
	Planetary Exploration Missions	400
	Data and Tools	400
	Data Sources.....	406
	Documentation and Resources	414
	Locations	417
	Persons	421
	Subjects.....	423
