

# List of Figures

Fig. 1.1	Facies succession: According to Walther's Law	10
Fig. 1.2	Example field geological log, of Cerro Peraljos section, Sorbas Basin, southeast Spain	19
Fig. 2.1	Formation of cross beds in a sandstone river channel	34
Fig. 2.2	Cross section depicting typical oil traps	37
Fig. 3.1	Borehole design	59
Fig. 3.2	Reflection seismic principle, ray paths from source to receivers for a single reflector	70
Fig. 3.3	Re-ordered seismic ray paths between shots and receivers around common reflection point	71
Fig. 4.1	Wireline log responses to sand, shale and hydrocarbons	97
Fig. 6.1	Outcrop pattern of a plunging anticline (and syncline)	136
Fig. 6.2	Depositional settings; (a) at high sea level and (b) at low sea level	150
Fig. 6.3	Examples of stratigraphic trap geometry	153
Fig. 7.1	Onshore development wells, based on Dación Field	168
Fig. 7.2	A dipping plane cutting a cylinder	181
Fig. 8.1	Cut away 3D schematic of a shale play development	208

1	Rocks Work	1
2	Oil Play	29
3	Drilling Reflections	55
4	Interpretation in Time	83
5	New Adventures	109
6	The Field of Prospects	133
7	Gas on Tap	163
8	The Price of Oil	193
	Glossary	221
