

CONTENTS

Preface		xi
Acknowledgments		xiii
Chapter 1	Implications for Great Earthquakes from Total Accumulated Slip along the Southern Segment of Nankai Trough, Japan: Analyses from Kinematic, Coseismic Rupture, and Tsunami Models <i>Elliot Klein, Gerald Galgana, Bingming Shen-Tu, and Mehrdad Mahdyiar</i>	1
Chapter 2	Rapid Tsunami Warning within Five Minutes for Regional Sources <i>John Ristau</i>	33
Chapter 3	Using Waveform Cross-Correlation to Investigate Tsunami Propagation <i>Mark R. Legg, Aggeliki Barberopoulou, Edison Gica and Geoffrey Legg</i>	63

Chapter 4	Advances in Tsunami Simulations and Recommendations for the Tsunami Evacuation Planning of Local Governments in Taiwan <i>Bing-Ru Wu, Siao-Syun Ke, Chin-Hsun Yeh and Tso-Ren Wu</i>	89
Chapter 5	The Consideration of a Damage Mechanism for Bridge Girders <i>Taro Arikawa, Aggeliki Barberopoulou and Kyuichi Maruyama</i>	131
Chapter 6	Tsunami Damage Evaluation of Utatsu Ohashi Bridge By Motion Picture and 2-D Simulation Analyses <i>Kenji Kosa</i>	159
Chapter 7	The Economic Cost of a Tsunami in Southern Chile: What Would the Recurrence of a Mw9.5 Megathrust Earthquake Mean Today <i>Arash Nasser, Aggeliki Barberopoulou and Megan Torpey</i>	185
Chapter 8	The Untold Side of the Tsunami Hazard: Interviews with Survivors <i>Jeanne Branch Johnston, Walter C. Dudley and James Goff</i>	213
Chapter 9	Revealing the Invisible Environments of Risk and Resiliency in Vulnerable Communities through Geospatial Techniques <i>Jacqueline W. Curtis, Andrew Curtis and Scott A. Hemmerling</i>	245
