

Table of Contents

Chapter 1	Tsunami-Driven Debris Motion and Loads: A Critical Review	1
Chapter 2	A New Approach to Short-Term Tsunami Forecasting	27
Chapter 3	Integration of Spatial Analysis for Tsunami Inundation and Impact Assessment	67
Chapter 4	Tsunami Hazard Analysis of Future Megathrust Sumatra Earthquakes in Padang, Indonesia Using Stochastic Tsunami Simulation	87
Chapter 5	Earthquake and Tsunami Knowledge, Risk Perception and Preparedness in the SE Bangladesh	121
Chapter 6	Estimation of Tsunami Hazard Vulnerability Factors by Integrating Remote Sensing, GIS and AHP Based Assessment	141
Chapter 7	Probabilistic Earthquake–Tsunami Multi-Hazard Analysis: Application to the Tohoku Region, Japan	165
Chapter 8	Advances in Earthquake and Tsunami Sciences and Disaster Risk Reduction Since the 2004 Indian Ocean Tsunami	199

Chapter 9	Tsunami Waves Extensively Resurfaced the Shorelines of an Early Martian Ocean	225
Chapter 10	Time Evolution of Man-Made Harbor Modifications in San Diego: Effects on Tsunamis	239
Chapter 11	Possible Failure Mechanism of Buildings Overturned during the 2011 Great East Japan Tsunami in the Town of Onagawa	265
Chapter 12	Tsunamigenic Earthquakes at Along-dip Double Segmentation and Along-strike Single Segmentation near Japan	297
Chapter 13	The Tsunami Vulnerability Assessment of Urban Environments through Freely Available Datasets: The Case Study of Napoli City (Southern Italy)	317
Chapter 14	Lessons Derived from Two High-Frequency Sea Level Events in the Atlantic: Implications for Coastal Risk Analysis and Tsunami Detection	347
Chapter 15	An Evaluation of Onshore Digital Elevation Models for Modeling Tsunami Inundation Zones	379
	Index	413
