

Table of Contents

Chapter 1	Hydrography-Physical Description of the Bohai Sea	1
Chapter 2	The Impacts of Wind and Air Pressure on Fluctuations of the Mean Bohai Sea Level	23
Chapter 3	Climate Change, Coastal Vulnerability and the Need for Adaptation Alternatives: Planning and Design Examples from Egypt and the USA	37
Chapter 4	The Impact of Uncertainties in Ice Sheet Dynamics on Sea-Level Allowances at Tide Gauge Locations	57
Chapter 5	Morphodynamics at the Coastal Zone in the Laizhou Bay, Bohai Sea	85
Chapter 6	Coastal Flood Assessment Based on Field Debris Measurements and Wave Runup Empirical Model4	107
Chapter 7	Role of Beach Morphology in Wave Overtopping Hazard Assessment	143
Chapter 8	Effect of Coastal Erosion on Storm Surge: A Case Study in the Southern Coast of Rhode Island	171

Chapter 9	Bias and Efficiency Tradeoffs in the Selection of Storm Suites Used to Estimate Flood Risk	195
Chapter 10	Influence of Rising Sea Level on Tidal Dynamics in the Bohai Sea	223
Chapter 11	Coastal Ecosystem Effects of Increased Summer Temperature and Contamination by the Flame Retardant HBCDD	241
Chapter 12	Multi-Layered Stratification in the Baltic Sea: Insight from a Modeling Study with Reference to Environmental Conditions	271
Chapter 13	Modelling of Storm Impacts on the Shandong Peninsula Coast	309
Chapter 14	Towards the Development of an Operational Forecast System for the Florida Coast	329
Chapter 15	Application of State of the Art Modeling Techniques to Predict Flooding and Waves for a Coastal Area within a Protected Bay	361
	Index	389
