Table of Contents

Chapter 1	Earthquake Disaster Management Approach: The Case of Al-Ais, Medina Area in Saudi Arabia	1
Chapter 2	How to Identify Foreshocks in Seismic Sequences to Predict Strong Earthquakes	23
Chapter 3	Earthquake Prediction	45
Chapter 4	How to Predict Earthquakes with Microsequences and Reversed Phase Repetitive Patterns	71
Chapter 5	Earthquakes and Structural Damages	89
Chapter 6	Earthquake Instrumentation	113
Chapter 7	The South-Western Alboran Earthquake Sequence of January-March 2016 and Its Associated Coulomb Stress Changes	133
Chapter 8	Seismic Sequences' Branching Structures: Long-Range Interactions and Hazard Levels	157
Chapter 9	Evaluation of Soil-Structure Interaction on the Seismic Response of Liquid Storage Tanks under Earthquake Ground Motions	177
Chapter 10	Estimating the Frequency, Magnitude and Recurrence of Extreme Earthquakes in Gulf of Aqaba, Northern Red Sea	195

Chapter 11 Seismic Sequence Structure and Earthquakes Triggering Patterns 213

Chapter 12 Seismic Hazard Assessment of Western Coastal Province of Saudi Arabia: Deterministic Approach 237

Chapter 13 Complete Coverage Path Planning for a Multi-UAV Response System in Post-Earthquake Assessment 263

Chapter 14 Short-Term Earthquake Forecast with the Seismic Sequence Hierarchization Method 287

Chapter 15 Earthquake Damage Visualization (EDV) Technique for the Rapid Detection of Earthquake-Induced Damages Using SAR Data 315

Chapter 16 Seismic Performance of Historical and Monumental Structures 333

Chapter 17 Crustal Structure and Seismogenic Zone of Cameroon: Integrated Seismic, Geological and Geophysical Data 359

Chapter 18 Seismicity in the Antarctic Continent and Surrounding Ocean 375

Index 393
