	PAGE
Transverse Mollweide's Equal-Area Projection (Close)	<i>Frontispiece</i>
PREFACE TO FIRST EDITION	v
" " SECOND EDITION	viii

CHAPTER I

INTRODUCTION

Definition of a projection	1
The representation of scale	2
The representation of areas	3
The representation of shape	4
The representation of true bearing and distance	6
Ease of drawing	7
Choice of a projection	7

CHAPTER II

THE PRINCIPAL SYSTEMS OF PROJECTIONS

Conical projections	10
Simple conic with one standard parallel	10
Conic with two standard parallels and true meridians	13
Conical equal area with one standard parallel	14
Conical equal area with two standard parallels (Albers')	16
Conical orthomorphic	17
General remarks on the conical projections	19
Oblique conic projections	21
Zenithal projections	21
Cylindrical projections	22
Summary	23

CHAPTER III

CYLINDRICAL PROJECTIONS

	PAGE
Simple cylindrical, or square projection	25
Cylindrical with two standard parallels	26
Cylindrical equal area	26
Cylindrical orthomorphic (Mercator).	27
Use of Mercator's in navigation	29

CHAPTER IV

ZENITHAL PROJECTIONS

Zenithal equidistant projection	32
Zenithal equal area projection	33
Zenithal orthomorphic (Stereographic)	34
Table of related projections	35
Airy's projection by "balance of errors".	36

CHAPTER V

ZENITHAL PROJECTIONS, *continued*

Perspective projections	38
Gnomonic projection	39
Projection of sphere on circumscribed cube	41
Construction of a great circle	42
Oblique cube	43
Distance on a great circle	46
Stereographic projection	46
Clarke's minimum error projection	47
Sir Henry James' projection	48
Orthographic projection	49

CHAPTER VI

MODIFIED CONICAL AND CONVENTIONAL PROJECTIONS

Bonne's projection	52
Sanson-Flamsteed projection	53
Werner's projection	53
Polyconic projection	54
Rectangular polyconic projection	56

	PAGE
Projection of the International Map	56
Plane Table graticule	58
Projection by rectangular coordinates (Cassini)	59
Mollweide's homolographic projection	60
Aitoff's projection	62
Breusing's projection	62
Globular projection	64
Nell's modified globular projection	64

CHAPTER VII

PROJECTIONS IN ACTUAL USE

In topographical maps	65
In Atlases	67
Identification of projections	70
Choice of a projection	72

CHAPTER VIII

THE SIMPLE MATHEMATICS OF PROJECTIONS

Standard notation	75
Conical projections	75
Simple conic	78
Conic with two standard parallels and true meridians	81
Choice of standard parallels	82
Computation of five cases	83
Simple conical equal area	88
Albers' conical equal area	90
Conical orthomorphic	93
Zenithal projections derived from conical	97
Zenithal equidistant	99
Zenithal equal area	99
Zenithal orthomorphic	100
Bonne's projection	101
Mercator's projection	103

CHAPTER IX

THE NUMERICAL ERRORS OF PROJECTIONS

Conical projections: radii of parallels	105
Errors of projections for maps of continents	106

CHAPTER X

TABLES

	PAGE
I. Distances and azimuths	110
II. Degrees of the meridian and parallel	112
III. Lengths of circular arcs	112
IV. Radii of curvature	113
V. International map of the World, on the scale of one in a million	114
VI. Specimen of Tables for maps on scale of $1/250,000$ and $1/125,000$	117
VII. Specimen of Tables for Plane Table graticules	118
VIII. Comparison of the radii in different Zenithal projections	120
IX. Distance between the parallels on Mercator's projection	120
X. Distance of parallels from equator, Mollweide's projection	121

APPENDIX TO FIRST EDITION

Polyhedric projection	122
Gauss' "conformal" projection	123
Mecca retro-azimuthal projection	123

CHAPTER XI

CORRECTIONS AND ADDITIONS TO PREVIOUS CHAPTERS

CHAPTER XII

PROJECTIONS FOR TOPOGRAPHICAL MAPS ON
LARGE SCALES

Conditions to be fulfilled	133
Figure of the Earth	134
Cassini's projection	134
Lambert's conical orthomorphic	136
Rigorous theory	137
Calculation of example	140
Choice of projection	144
Expansions in series	145

CHAPTER XIII

NOTES ON THE HISTORY OF MAP PROJECTIONS

CHAPTER XIV

ADDITIONAL TABLES

Projection of International Map: scale $1/2$ M.	151
Projection for Map of Asia: Lambert's conical orthomorphic: $1/5$ M.	155
INDEX	157
