

Table of Contents

Chapter 1	Elements of Photogrammetry	1
	Introduction.....	1
	1.1 Elements of Analytical Photogrammetry.....	1
	1.1.1 Coordinate Systems.....	4
	1.1.2 Interior Orientation	5
	1.1.3 Correction for Refraction.....	8
	1.1.4 Correction for Earth Curvature	9
	1.1.5 Exterior Orientation	11
	1.1.6 Basic Elements of Air Photo Interpretation	14
	1.2 Aerial Photogrammetry	15
	1.2.1 Types of Photogrammetry.....	17
	1.2.2 Aerial Photogrammetry versus Traditional Surveying Techniques.....	18
	1.3 Aerial Photography	21
	1.3.1 Properties of Aerial Photography	22
	1.3.2 Classification of Aerial Photographs	25
	1.3.3 Geometric Properties of Aerial Photographs.....	26
	1.3.4 How is Aerial Photography Done?	30
	1.3.5 Conservation Photography	31
	Summary	33
	References	33
Chapter 2	Geographic Information System (GIS)	39
	Introduction.....	39
	2.1 Overview of GIS.....	41
	2.1.1 History of GIS Development.....	42
	2.1.2 What can we do with GIS?	44
	2.1.3 GIS Subsystems.....	46
	2.1.4 GIS Data Models.....	48
	2.1.5 GIS Data Types.....	49
	2.1.6 Attribute Data Models	56
	2.1.7 Spatial Data Relationships.....	61
	2.1.8 Topology	62

2.2 Data Sources	63
2.2.1 Sources of Data.....	65
2.2.2 Data Input Techniques.....	66
2.2.3 Data Editing and Quality Assurance	72
2.2.4 Data Organization and Storage	76
2.3 Data Analysis.....	83
2.3.1 Manipulation and Transformation of Spatial Data.....	84
2.3.2 Integration and Modelling of Spatial Data	87
2.3.3 Integrated Analytical Functions in a GIS	88
2.3.4 Implementation Issues and Strategies.....	95
2.3.5 Developments and Trends.....	104
Summary	108
References	108

Chapter 3 Remote Sensing Technology 111

Introduction.....	111
3.1 Overview of Remote Sensing Technology.....	113
3.1.1 History of Remote Sensing.....	114
3.1.2 Data Acquisition Techniques	115
3.1.3 Types of Resolution.....	119
3.1.4 Converting Remote Sensing Data into Geospatial Data	121
3.1.5 Geometric Correction	121
3.1.6 Photogrammetry Correction.....	122
3.1.7 Radiometric Correction.....	123
3.1.8 Visual Image Interpretation	124
3.1.9 Automated Classification	125
3.1.10 Mapping Spatial Variables	126
3.1.11 Creating Elevation Data from Remote Sensing Data	127
3.1.12 Remote Sensing Software	127
3.2 Applications of Remote Sensing and GIS.....	128
3.2.1 Crop Production Databases	129
3.2.2 Process of Remote Sensing	129
3.2.3 Types of Remote Sensing System	131
3.3 Mapping Soil Resources with Remote Sensing Data.....	138
3.3.1 Spectral Reflectance of Soils.....	139
3.3.2 Soil Mapping.....	141
Summary	144
References	145

4.1 The History of Cartography	152
4.1.1 Cartography	153
4.1.2 Technological Changes	156
4.1.3 Elements of Cartography.....	156
4.2 History of Map Making	158
4.2.1 Types of Maps Based on Scale	161
4.2.2 Types of Maps Based on Function.....	162
4.3 Uses of Maps	169
4.3.1 Measurement of Distance.....	169
4.3.2 Measurement of Direction.....	169
4.3.3 Measurement of Area.....	170
4.4 Principles of Map Design	171
4.4.1 Map Composition.....	173
4.4.2 Map Symbolization	175
Summary.....	184
References	185

Chapter 5 Global Positioning System 189

Introduction.....	189
5.1 What is GPS	190
5.2 Segments of GPS	196
5.2.1 Space Segment.....	197
5.2.2 Control Segment	203
5.2.3 User Segment	204
5.3 Basic Concept of GPS Receiver and its Components.....	204
5.3.1 Classification of GPS Receivers	207
5.3.2 Navigation Receivers	212
5.3.3 Accuracy.....	213
5.3.4 Types of Errors	214
5.4 Differential GPS	215
5.4.1 DGPS Architecture	216
5.4.2 DGPS Implementation Types.....	218
5.4.3 DGPS Accuracy.....	223
5.4.4 DGPS Error Sources	223
Summary.....	227
References	227

Chapter 6	Spatial Referencing and Positioning	231
	Introduction.....	231
	6.1 Concept of Spatial Reference	232
	6.1.1 Reference Surfaces for Mapping.....	235
	6.1.2 Coordinate Systems.....	245
	6.2 Map Projections.....	252
	6.2.1 Classification of Map Projections	254
	6.2.2 Scale Distortions on a Map.....	257
	6.2.3 Choosing a Map Projection	260
	6.2.4 Map Projections in Common Use.....	264
	6.3 Satellite Based Positioning.....	275
	6.3.1 Conversion of Data Referenced to Different Positioning Systems	276
	6.3.2 Absolute Location and Coordinates	278
	6.3.3 Relative Positioning.....	279
	6.3.4 Networks Positioning.....	280
	Summary	281
	References	281
