LiDAR Data Index Map.....	ix
Foreword	xi
Preface.....	xiii
Authors.....	xv
List of Abbreviations.....	xvii
Chapter 1 Brief Overview of Remote Sensing.....	1
1.1 From Aerial Photography to Remote Sensing.....	1
1.2 Multispectral Remote Sensing.....	3
1.3 Hyperspectral Remote Sensing	4
1.4 Radar Remote Sensing	7
1.5 LiDAR Remote Sensing	10
References	13
Chapter 2 Principles of LiDAR Remote Sensing.....	19
2.1 Introduction	19
2.2 Basic Components of LiDAR.....	19
2.3 Physical Principles of LiDAR	19
2.4 LiDAR Accuracy.....	22
2.5 LiDAR Data Formats	22
2.6 LiDAR Systems.....	26
2.7 LiDAR Resources.....	26
Project 2.1: Review of Zonal Statistics for Raster Data in ArcGIS.....	27
Project 2.2: Creating an LAS Dataset Using LiDAR Point Clouds from Fremont, CA, USA.....	31
Project 2.3: Exploring Airborne LiDAR Data	35
References	39
Chapter 3 Basics of LiDAR Data Processing	41
3.1 Introduction.....	41
3.2 Filtering	43
3.2.1 TIN-Based Methods.....	43
3.2.2 Raster-Based Methods.....	45
3.3 Classification of Non-ground Points.....	46
3.4 Spatial Interpolation	46
Project 3.1: Creating DTM, DSM, and DHM from LiDAR Data in Indianapolis, IN, USA	49

Project 3.2: Generating a Terrain Dataset Using LiDAR Data from St. Albans, VT, USA	54
References	60
Chapter 4 LiDAR for Forest Applications	63
4.1 Introduction	63
4.2 Canopy Surface Height Modeling and Mapping	64
4.3 LiDAR Metrics for Vegetation Analysis	70
4.4 Individual Tree Isolation and Mapping	72
4.4.1 Grid-Based Tree Mapping	72
4.4.2 Point-Based Tree Mapping	77
4.4.3 Remaining Challenges in Tree Mapping	78
4.4.4 Modeling and Predicting Individual Tree Attributes	79
4.4.5 A Simulation Study for Tree Isolation	79
4.5 Area-Based Modeling and Mapping	83
4.6 Modeling, Mapping, and Estimating Biomass	84
Project 4.1: Extracting Canopy Heights from Leaf-On and Leaf-Off LiDAR Data in Susquehanna Shale Hills, PA, USA	91
Project 4.2: Identifying Disturbances from Hurricanes and Lightning Strikes to Mangrove Forests Using LiDAR Data in Everglades National Park, FL, USA	95
References	105
Chapter 5 LiDAR for Urban Applications	111
5.1 Introduction	111
5.2 Road Extraction	111
5.3 Building Extraction and 3D Reconstruction	114
5.4 Population Estimation	117
5.5 Change Detection	119
5.6 Assessment of Post-Disaster Building Damage	125
5.7 Assessment of Post-Disaster Road Blockage	127
Project 5.1: Locating 3D LiDAR Points Near a Powerline in the City of Denton, TX, USA	131
Project 5.2: Small-Area Population Estimation Using Count, Area, and Volume of Residential Buildings Extracted from LiDAR Data in Denton, TX, USA	134
References	144
Chapter 6 LiDAR for Geoscience Applications	151
6.1 Introduction	151
6.2 Aeolian Landforms	151
6.3 Fluvial Landforms	157

6.4	Surface Hydrology.....	158
6.5	Volcanic and Impact Landforms.....	160
6.6	Tectonic Landforms.....	162
6.7	Lithology and Geologic Structures.....	169
Project 6.1:	Measuring Sand Dune Migration Using Multi-Temporal LiDAR Data in White Sands Dune Field, NM, USA.....	173
Project 6.2:	Deriving Trend Surfaces of Simple Folds Using LiDAR Data in Raplee Ridge, UT, USA.....	182
	References	190
	Index.....	197
